

## Adarvo ThemeWare – compared with other solutions

Today, the idea of collaboration or communications software covers a very wide range of different types of solution. In addition there are, technically, different ways for people to exchange data or send information from one location to another. Most of the software solutions available are very expensive, and complicated when it comes to installing or using them. Only very few solutions were designed from the start for efficient sharing and cooperation, for example in an team, group etc. The table below compares Adarvo ThemeWare's features directly with e-mail, LAN/WAN (corporate network) and other professional web-based collaboration tools.

criteria	Adarvo	E-mail	LAN/WAN	Web-based Collaboration
Program ease of use	3	3	–	partial
Usable in a few minutes	3	partial	–	partial
Encrypted data transfer	3	Add-on module	3(with VPN)	partial
Archiving/backup	3	–	Add-on module	–/partial
Simple and cost-effective				
Scalability	3	3	–	partial
Group-working/data exchange/collaboration	3	–	–	3
Document management	3	–	–	partial
Versioning	3	–	–	partial
Personal knowledge management	3	–	–	–
Content management & website-publication	3	–	–	partial
World-wide data mobility	3	–	3(with VPN)	3
Web-based access	3	–	–	3
Online and offline access to/up personal data	3	possible	–	–
Seamlessly integrated in Microsoft Office programs	3	(only Outlook)	3	–
Networked communication with PDA, mobile phone etc.	3	–	–	Add-on module
Equivalent costs/no initial investment	3	3	–	–
Theme-oriented organization of all data, e-mails, URLs etc.	3	–	–	–
Unique definition of original document ("only one original"!	3	–	–	–
Install messaging	planned	–	–	Add-on module
Simultaneous document processing	–	–	–	partial
